

In this section are the PDF and the MIDI files from my Sibelius 8 bass-part extraction process.

The contents of these files differ in some ways from the official music sheets. The files must be regarded as aids to, and not as replacements for, or copies of, the official music sheets, or the other website sound files. They must be treated as internal documents restricted to use only within the choir.

Please report any errors you may find.

Please note:-

- All song titles have had leading articles (**A, An, The**) removed
- The title line in each song's PDF has the catalogue number in [square brackets] where known
- Some PDFs have had rest bars compressed, some have not
- Some songs have a number of bass rest bars so when playing the MIDI file you may have to just wait until the bass sound comes in. The corresponding PDF will show these rest bars
